

## **ALCOLOR PTRcut 400**

### **Plastic ROLLS AND TUBES CUTTING MACHINE**

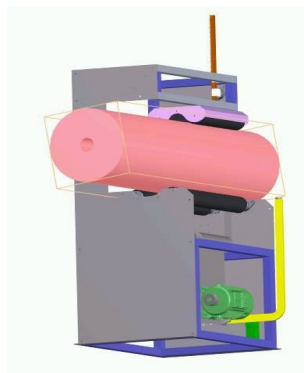

The machine cuts Rolls and Tubes of maximum outside diameter 400 mm and min inside diameter 75 mm:

- It cuts slices Protection plastic tape rolls, Plastic or aluminium tubes, Carton tubes-cores
- roll height (length) up to 2000 mm
- This is achieved by the simultaneous rotation of the roll to be sliced and the 400 mm diameter saw disc emerging from below. The manual operation of the saw disc is mechanically assisted.
- In case of tape roll's diameter less than 150 mm the saw disc should be replaced with a  $\Phi 350$  mm one
- The saw disc is a carbide tipped one identical to the discs used for saw cutting of aluminium profiles.
- The cut width is 3,7 mm.

Two (2) driving motors: 1,1 kw plus 0,55 kw

Electric: 380 V, 3 ph., 50 or 60 Hz

The tape roll's diameter shown in the above photos is 170 mm
